

DIN Female Plug Copper 4G Dummy Load 50 Watt

Product Description:

DIN Female Plug Copper 4G Dummy Load 50 Watt

50 Watts 3.8GHZ 4GHZ 6GHZ DIN Female Low PIM -163dbc -165dbc RF Load Termination

Dummy load/Low PIM Termination/Load is a device used to stop some port as a RF power load when testing other RF products or stop the RF power radiation when some port is not used at present , the theory is matching similar impedance to real device that will be connected to the RF System. Dummy load also will absorb some power and getting heating when RFA system works, so when use dummy load to stop some port in the RF system, pay attention to the power handling , otherwise may be over-heated.
