

## Patch Panel MIMO Antenna Model No- SRFS-MPA-NF-3.8-9

### Product Feature

- Compact, Low Weight
- Wide Frequency Band
- High Reliability
- Simple Installation

| Electrical, Mechanical & Environmental Specification |                      |
|------------------------------------------------------|----------------------|
| Frequency                                            | 698-3800 MHz         |
| Gain                                                 | 5-9 dBi              |
| VSWR                                                 | $\leq 1.3$           |
| Polarization                                         | Linear               |
| Passive Inter Modulation (PIM)                       | $\leq 140\text{dBc}$ |
| Power Handling                                       | 100W                 |
| Impedance                                            | 50 Ohm               |
| BW/Vertical                                          | 73°/70°/60°/60°/55°  |
| BW/Horizontal                                        | 80°/80°/65°/60°/55°  |
| Lighting Protection                                  | DC-Ground            |
| Connector Type                                       | N-Female             |
| Operating Temperature Range                          | -35°C to +65°C       |
| Antenna Color                                        | White                |
